

# Certification Policy

eQuest is an Online Learning Service of QCI. eQuest offers learning and certification opportunity to its learners. eQuest is equipped with a unique model of blended learning where learners complete the Stage-I will be eligible for the Stage-II. Our learning model is designed to enable learners to learn at their own pace. It also ensures that the certification process has high integrity and value for the learner as well as the industry by making it a two-step certification process. The certification process is illustrated below:

## eQuest Certification Process:

### Stage: I

#### How to Get a Participation Certificate:

Learners will be required to complete all modules in a typical course which includes video lectures, eBook, and the test/quiz as per the course requirement. At our eLearning platform, the learner will be required to complete the processes and take all the exams and try to achieve the highest grade. As the system records the learners' performance and learning activities, the final score will be based on a weighted average score of all the tests undertaken by the learner.

Learners will be required to go through Inline Tests followed by a Midterm Exam and a Final Exam within the specified time limits. They will receive the final certificate based on their actual performance in all the online exams. Only Soft Copy of the certificate will be issued to successful learners whose authenticity will be verifiable from eQuest Website.

Only those learners who achieve >60% Score in Participation Certificate will be eligible for the Stage- II. We will allow those learners to opt for the Stage-II (Professional Certification Exam).

## **Stage: II Professional Certificate**

After successful completion the Stage I, learners who are desirous of getting a Professional Certificate will need to go for the face-to-face contact session at any QCI approved/ designated centre. It will be followed by an examination during the contact session.

The Contact Session along with Professional Certification Exams for Stage II will be held at various QCI designated/Authorised Testing Centres from time-to- time. This will involve additional expenses which will vary from course to course.

A hard copy of certificate will be issued by QCI to successful participants. Such certificates can be prominently displayed and used by learners for their professional endeavours.

The syllabus of the certification exam will be based on the Curriculum of the Stage I.

Only those learners who achieve 4 stars in their final score will be allowed to take the Stage II Professional Certification Exam.

Separate Charges will become applicable for Stage II Exam as well.
